Long & short, long & short
A world of words

THE UNIVERSITY OF CHICAGO
THE DIVISION OF PHYSICAL SCIENCES

1. The first step is to identify the problem and its scope. This involves understanding the current situation and the goals that need to be achieved.

2. The next step is to gather information and resources. This includes researching the problem, identifying stakeholders, and determining the resources available.

3. The third step is to develop a plan. This involves setting priorities, identifying tasks, and determining the timeline for completion.

4. The fourth step is to implement the plan. This involves executing the tasks, monitoring progress, and making adjustments as needed.

5. The fifth step is to evaluate the results. This involves assessing the outcomes, identifying lessons learned, and determining the next steps.

6. The final step is to celebrate the success. This involves recognizing the achievements, sharing the results, and expressing gratitude to all who contributed.
